

Enhance the Productivity of your Team: Automate Inbound Fax Processing

Our solution can automatically identify documents and extract data from even the most complex faxes.

Efficiently Extract Key Inbound Fax Data

Our AI-driven fax processing solution can automate and accelerate document processing in any organization with:

Advanced fax cleanup and rotation ensures scanned documents are optimized for readability and accuracy.

Whole page AI-based OCR and intelligent Handwriting analysis with validation from scanned documents.

Automatic detection of document types, enabling the system to extract relevant fields and route documents.

Experience the Difference: Intelligent Fax Processing

RightFax enabled you to streamline the transmission of documents. ***Now let us you help streamline the processing of your received documents.***

Our AI-driven fax processing solution empowers organizations to:

- Reduce Costs
- Eliminate Low-Value Processes
- Improve Patient Care
- Automate Patient Association

By adding AI-driven processing and automated data extraction capabilities to your RightFax system, we can help make inbound fax processing inefficiencies a thing of the past.

“The fact that the documents no longer need to be entered manually into the system means huge time savings for us...”

— **Norbert Benzer, Business Process Manager at Mitsubishi Chemical Advanced Materials**
